

***WHAT'S RCA Connector:**

An "RCA" connector is the type of video connector you're most likely to be familiar with, and is the standard audio and video connector type on most consumer gear.

An RCA jack (the female connector, mounted to the equipment panel) looks like a short cylinder of metal, with a large hole in the center, while the RCA plug (the male connector, mounted on the cable) has a large pin in the center and an outer ring of metal which grips the RCA jack on the outside.

Here are an RCA plug and a typical set of jacks:
